

## A Field-Proven, Complete Wellsite Solution

The most advanced surface system on the market, **GUIDE MWD Surface System** includes a rich feature set designed to optimize decoding and functionality in a highly compact design.

### GUIDE MWD Surface System Features

- Automated filtering and decoding
- Wireless link from rig floor to shack (cable link available)
- Automated logging
- Well archiving
- User friendly WITS interface
- Complete Surface System, no additional hardware or software needed
- Water-tight, durable Pelican case
- Rugged marine connectors

### AIM (Automated Intelligent Matrix) Filtering

- Automated decoding optimization
- Matrix of multiple decoding filters
- Continuous filter quality monitoring

Track downhole performance and operational history with Tolteq's SMART technology. Get Tolteq & Get SMART!

## Compact, Efficient and Powerful

Tolteq's **GUIDE MWD Surface System** delivers a potent product in a compact package. The entire setup, including cables, fits into a durable, water-tight Pelican case—less than 6 square feet! Rest assured the rugged marine connections will withstand the roughest conditions and ensure your MWD surface system is the best it can be.

## SSI (Surface System Interface) Cable

### SSI (Surface System Interface) Cable Features

- Complete simulation of surface and downhole equipment
- Programming interface to downhole tool
- Remote Radio Link
- Rugged Molded Construction
